## About me

I am a Frontend Developer with one year of commercial experience, including 6 months in a product company, where I contributed to the development of important features and participated in core product workflows.

I continuously improve my skills in frontend development, primarily working with React. I am also interested in backend development and aim to grow into a Fullstack Developer in the future. I have some experience with React Native and am currently learning Next.js.

I am a friendly, proactive, and detail-oriented team player with strong problem-solving skills. I collaborate effectively with designers, backend developers, and QA engineers.
